Tri Phase Cleanser

Gel to Oil to Milk

100 ml dispenser

Short Description

Skin types

Tri phase cleanser gel to oil to milk.

All skin types

Description

Innovative tri phase cleanser concentrate with multi adaptive texture. When applying the gel turns into an oil and when rinsing with water into a milk. Thus the product is cleansing the facial skin very thoroughly and removes oil- and water-soluble particles like intensive make up, sebum and environmental pollution very gently. The formula does not dry out the skin and cares with high quality sun flower oil. Panthenol soothes and the high performance moisturizer Pentavitin® with 72 hours long term effect intensively moisturizes already when cleansing. Suited for all skin types.

Purpose and function

- Cleanses the skin in three phases
- Thorough cleansing
- Removes oil- and water- soluble particle like make up, sebum and environmental pollution
- Soothes and intensively moisturizes with 72 hours long term effect

Main active substances:

- **Helianthus Annuus (Sunflower) Seed Oil:** Sunflower oil, extracted from the seeds of sun flower. Contains a high proportion of unsaturated fatty acids, especially Linoleic acid, Vitamin E, A, C, D and Carotenoids. It has elasticity-increasing effect on the skin and has regreasing features.
- **Pentavitin®:** Sustainably improves the skin's moisture retention capacity, as this combination of various sugar compounds binds firmly to the surface of the skin and is not rinsed off during washing. Pentavitin® prevents moisture loss – even under dry environmental conditions.
- **Sucrose Laurate:** Sugar esters derived from starch and vegetable Lauric acid. Make the skin smooth and supple.
- **Bis-Diglyceryl Polyacyladipate-2:** Skin-friendly, oil-soluble component with refatting and smoothing effect.
- **Sucrose Palmitate:** Reduces the interfacial tension of cosmetic products and contributes to an even distribution in the application. Makes the skin supple and smooth.
- **D-Panthenol:** Soothes the skin, improves its regeneration activity and leaves a velvety soft feel on the skin.

Professional Application

Apply the **Tri Phase Cleanser** concentrate to the skin and work it in. The cleanser now becomes oily and by adding water a cleansing milk appears. Then simply remove with damp warm compresses.

Home Care Application

Apply to the skin in the morning and the evening and work in circular motion. The cleanser now becomes oily and by adding water a cleansing milk appears. Now simply rinse with water. Then apply the usual day or night care.
