Restorative Cream

Ref. 4120/4120P

Description	Night cream with fruit acids to speed up cell renewal
Retail size	50 ml dispenser
Professional size	150 ml dispenser
Skin type	All skin types
Product galenics	Cream

Description

Smooth and even skin with fine pores is the ideal of many men and women. With intact circulation and well moisturized, it radiates youthfulness and freshness. The skin normally renews itself every 4 weeks by means of a natural peeling process. As we age, this process becomes increasingly slow. The skin has difficulty in shedding its gray veil of loose, dead skin cells. The complexion's freshness and youthful radiance are reduced. Thickening of the top layer of skin can additionally lead to the occurrence of blemishes, as the pores are clogged. It is then high time to offer it some support in the form of a course of fruit acid treatment!

Restorative Cream is a treatment cream with concentrated natural fruit acids and caring contents. It has a relatively low lipid content and moisturizing active substances, and is suitable for all skin types.

Purpose and function

- Improves the skin structure thanks to the fruit acids
- Reduces wrinkles and scars
- Refines the skin pores
- Moisturizing and moisture-retaining
- Clarifies the skin complexion
- Inhibits the formation of new blemishes

Main active substances

AHA acids: Consisting of glycolic acid (sugar cane), malic, citric, tartaric acid; these remove dead horny cells (keratolytic effect), increase the cell renewal rate and improve the skin structure. Old, superfluous dead skin cells are dissolved and removed while new cells are able to reach the surface of the skin without obstacles.

Saccharide Isomerate: Sustainably improves the skin's moisture retention capacity, as this combination of various sugar compounds binds firmly to the surface of the skin and is not rinsed

off during washing. Saccharide Isomerate prevents moisture loss – even under dry environmental conditions.

Squalane: Obtained from plant-based olive oil, similar to the skin's natural lipid; is easily absorbed without leaving the skin feeling greasy; prevents dehydration (moisture loss); skin-smoothing

α -Bisabolol: Obtained from chamomile oil; a proven ingredient for soothing the skin

Note

pH value 4,0

Apply only on intact skin.

Avoid contact with eyes or mucous membranes.

Wash off immediately in the event of skin intolerance.

Store out of the reach of children.

For external application only.

Home care application

During the ***Skin Renewing Deep Cleansing Treatment***, the customer should apply Restorative Cream to the cleansed skin of their face, neck and cleavage every **evening** and rub it in gently.

Professional application

For a massage: distribute Restorative Cream onto the face, neck and neckline. To improve its sliding properties, then pour on a few drops of Massage Serum and massage as usual.

or

Use Premium Age Protector SPF 30 as a finishing product, so that the skin has the best possible protection from UV rays.
