Face Sculpture CREAM

Cream

50 ml dispenser
100 ml dispenser

Short Description

Rich lifting cream for firmer facial contours and a youthful complexion.

Skin type

All skin types

Description

The latest studies using computer simulation have revealed that the contour of the face plays a crucial role in estimating a woman's age. Sagging cheek areas cause us to appear older, even if the skin is otherwise smooth, rosy and flawless. **Face Sculpture CREAM** is the answer to this problem. This reconstructing cream „pads out“ skin in need of regeneration from its depths and therefore remodels the facial contours, so that the customer feels good in her skin again. The cream is used wherever skin aging is taking place. The innovative formula based on Elastin-stimulating peptides with scientifically proven effect, lifts and firms the facial contours and lends the skin a youthful radiance. However, **Face Sculpture CREAM** can do more than this! Thanks to a highly-active plant extract consisting of *Rabdosia Rubescens* and *Sigesbeckia Orientalis*, it specifically combats pigmentation disorders and age spots caused by melanin accumulations. It also reduces unattractive skin redness which can form as we age. **Face Sculpture CREAM** lends the skin a visibly more even and radiant complexion. **Face Sculpture CREAM** contains 27% of lipids. The emollient cream to restructure the skin contours is perfectly suited for women who prefer a rich facial care.

Purpose and function

- Firmer and more lifted facial contours
- Flawless and fresh complexion
- Rich but pleasantly light texture
- Mattifying effect
- Ideal foundation for make-up
- Intensive lifting effect

Main active substances:

- **3D Lifting Peptides:** Elastin-stimulating peptides to stimulate Elastin synthesis in the fibroblasts, firm the connective tissue structure and lift the facial contours.

Scientific studies on the effect of the Elastin-stimulating peptides:

Increase in Elastin synthesis:	+ 15,0 % (in vitro study)
Promotion of elastic fiber anchoring:	+ 94,0 % (in vitro study)
Increase in skin elasticity after 2 months:	+ 14,0 % (clinical study)
Lifting of the facial contours after 2 months:	+ 11,3 % (clinical study)

Self-assessment: 26 female volunteers with visibly sagging skin tested a cream containing 4% Elastin-stimulating peptides for 2 months in the morning and evening.

Remodeled face:	80 %
Less slack tissue:	64 %
Lifted facial contours:	62 %

- **Radiant Skin Complex:** Highly-active plant extract of Siegesbeckia Orientalis and Rabbosia Rubescens; has an anti-inflammatory and antioxidant effect, leads to a more even and radiant complexion

An in vitro study with a 3 % solution of this plant extract gave the following result:

Effect on browns spots (melanin)

45% lower melanin content

34% lower uptake of melanosomes in the keratinocytes

Effect on red spots (hemoglobin)

44% decrease in vascular endothelial growth factor (VEGF) – in vitro study

60% reduction in vascular sensitivity (in vitro study)

- **Long- and short-chain Hyaluronic acid:** Produced using biotechnology, it possesses a fill-in effect which “pads out” the skin from the inside out. The skin is lifted extensively.
- **Genuine Japanese Silk:** Possesses a structure similar to the skin; is rapidly absorbed, protects against dehydration, leaves the skin supple and soft.
- **Macadamia Nut Oil:** Softening and skin-smoothing, rich in Palmitoleic acid; which enhances the oil’s ability to penetrate into the skin.
- **Isostearyl-Isostearate:** Emollient based on sustainable raw plant materials; improves the cohesion of the lipids in the horny layer (Stratum Corneum) and reduces the skin’s trans-epidermal water loss.
- **Vitamin A palmitate:** Speeds up natural skin renewal.
- **Vitamin E acetate:** Radical scavenger; offers preventative cell protection; combats premature skin aging.

Professional Application

For a massage: Distribute **Face Sculpture CREAM** onto the face, neck and neckline. To improve its sliding properties, pour on a few drops of **Massage Serum** and massage as usual. Depending on the time of year and the time of day, use **Premium Age Protector SPF 30** or **Premium Age Protector Ultra SPF 30** (if the skin could still be exposed to UV rays) or **Face Sculpture CREAM** as a finishing product.

Home Care Application

In the morning: **Face Sculpture SERUM** and then **Premium Age Protector SPF 30** or **Premium Age Protector Ultra SPF 30** or **Face Sculpture CREAM**.

In the evening: **Face Sculpture SERUM** and then **Face Sculpture CREAM**. If the skin is not sensitive to UV-radiation any more **Face Sculpture CREAM** can be used as a day and night cream.

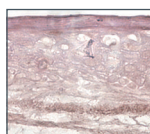

The efficacy of 3D Lifting Peptides has been confirmed impressively in clinical trials

ELASTIN SYNTHESIS

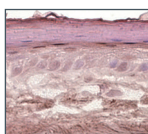

new Elastin / Tropoelastine:

- Normal humane fibroblasts + 325 %
- Artificially aged skin model + 14,8 %

Normal skin

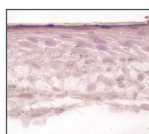

Control

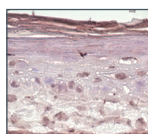

3D Lifting Peptides

Artificially aged skin

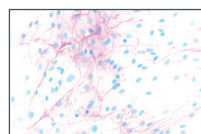

Control

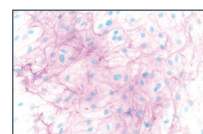

3D Lifting Peptides

ELASTIN ENCLOSURE

Determination of the quantity of Elastin / Tropoelastine that has been anchored in the extra cellular matrix: + 94 %

before

after

CONCLUSION: considerably more Elastin after the treatment with 3D Lifting Peptides
