# Premium Age Protector Ultra SPF 30

Cream

50 ml dispenser  
100 ml dispenser

Short Description

Light anti-aging cream with SPF 30 for oily and combination skin.

Skin type

Oily skin and combination skin

Description

**Premium Age Protector Ultra SPF 30** is a real multi-talent for combination and oily skin. It protects the skin against UV-radiation, Vitamin A works against premature skin-aging and a special pigment has an optical soft-focus effect on the skin. Evermat® regulates the sebum production and refines the pores.

Purpose and function

- Reliably protects the skin against UV radiation
- Reduces existing age spots
- Prevents the formation of new pigmentation spots
- Refines the pores for a more even skin profile
- For a visibly more even and brighter complexion
- Improves skin regeneration
- Reduces the depth and volume of wrinkles
- Mattifies and regulates the sebum production

Main active substances:

- **Soft Focus Pigments:** even out the skin texture and minimize lines and wrinkles.
- **Evermat®:** active substance from Oleanolic acid, obtained from the plant Enantia Chlorantha, refines the pores and reduces sebum gloss.
- **Stabilized Vitamin A:** stimulates cell growth, activates the enzyme activity and thus acts against premature skin aging.
- **UVA- + B-filters:** Reduce UV stress on the skin and protect against premature skin aging.

Professional Application

Use the cream after each Skin Renewal & Cellular Stimulation System treatment. Following the application of fruit acids, the skin reacts very sensitively to UV radiation and has to be well protected. Only **Premium Age Protector Ultra SPF 30** can do this.

Home Care Application

During the Skin Renewal & Cellular Stimulation System treatment course – i.e. the use of fruit acids – and a further 4 weeks afterwards, the skin reveals increased sensitivity to light. The following recommendation for the home during this period: First apply the corresponding inspira: med serum and allow it to work in briefly. Then apply **Premium Age Protector Ultra SPF 30** onto the face, neck and neckline in the morning. In the evening, use the cream appropriate to your serum.
