# AHA Radiant Complexion Pads

Soaked cellulose pads

40 Pads

## Short Description

Exfoliating Pads for daily use.

## Skin type

All skin types

## Description

Innovative Exfoliating Pads for daily use, that refine the skin's texture and gently remove dead skin cells with a combination of Glycolic, Lactic and Citric acid. With vegetal Glycerine the skin is protected against external aggression like air pollution and cold. It improves skin's elasticity and firms the skin. In addition, the skin is supplied with moisture. Panthenol soothes and nourishes the skin. The result is a radiant, youthful complexion.

## Purpose and function

- Gently removes dead skin cells
- Refines skin's texture
- Protects against external aggression
- Improves skin's elasticity
- Moisturizes
- Soothes

## Main active substances:

### Mix of fruit acids:

- **AHA acids:** Consisting of Glycolic acid (sugar cane), Malic, Citric, Tartaric acid; they remove dead skin cells (keratolytic effect), increase the cell renewal rate and improve the skin structure. Old, superfluous dead skin cells are dissolved and removed while new cells are able to reach the surface of the skin.
- **Glycerine:** Is hygroscopic and binds water in the upper layers of the Stratum corneum. This increases the moisture content of the skin and reduces transepidermal water loss.
- **D-Panthenol:** Soothes the skin, improves its regeneration activity and leaves a velvety soft feel on the skin.

## Professional Application

## Home Care Application

After cleansing in the evening gently apply the pad on the facial skin. Then use your serum and night care cream.

## Note

Apply only on intact skin. Avoid contact with eyes and mucous membranes. In the event of skin intolerance, remove immediately.
