DE LUXE CAVIAR Body Cream

luxurious body cream with
regenerating Caviar extract

200 ml
dispenser

PRODUCT BENEFIT

Luxurious body cream with precious, regenerating Caviar extract and nourishing natural components such as Shea Butter, Olive Oil and Vitamin E.

TARGET GROUP

De Luxe Caviar Body Cream is suited for all skin types but especially for dry body skin.

ACTIVE INGREDIENTS:

- **Hydrogenated Olive Oil (Olea Europaea Oil, Olive Oil Unsaponifiables):** The highly pure lipophilic ingredient resembles that of sebum in its hydro-lipid composition. Modern, raw material, which facilitates the incorporation of lipids by preventing oxidation. This active ingredient provides skin and hair with skin and hair thanks to the presence of flavonoids, squalene and polyphenols, gives the skin and hair a feeling of softness. Suitable for transport of lipophilic active ingredients into the skin.
- **Shea Butter (Butyrospermum Parkii Butter):** obtained from the seed of the Shea tree, a plant native to Africa, a strongly emollient fatty substance. The use of Shea Butter in cosmetics is based on its healing, emollient, elasticising, moisturising, antioxidant, soothing, filming and protective properties. However, its exclusive characteristic is the very high content of non-saponifiable (12 - 18 %) essential substances to improve the tone and elasticity of the skin. Another advantage of butter is its good filtering capacity against the sun's rays. Therefore, it is an excellent protection and preventive against skin damage caused by exposure to light, such as the formation of free radicals and the early appearance of wrinkles, but also against those caused by excessive sun exposure. Very rich in Vit A, B, E, F. It is used against drying and flaking of the skin and in hair care. It also has a regenerating activity and is considered an excellent anti-ageing ingredient.
- **Vegetable Glycerin:** Polyalcoholic molecule with properties reminiscent of sugar and naturally able to retain water, is also used for its characteristic moisturising action. With its strong moisturising action, it is ideal for keeping skin and hair healthy, protected, soft and hydrated.
- **Natural Triglycerides from Cocos (Cocoglycerides):** Widely used due to their composition rich in saturated fatty acids, but especially polyunsaturated fatty acids (PUFA), as they contain a high proportion of unsaponifiable fractions (hydrocarbons, carotenoids, tocopherols, sterols). PUFA in particular are of great importance for skin health as they are involved in numerous mechanisms of skin balance, starting with sebum formation to achieve cell membrane composition. Watermelons are also very important in sunscreens as they promote the optimal distribution of filters on the skin and increase the real SPF value.
- **Caviar Extract:** Consists of proteins, lipids and essential vitamins (A, B2, B6, B12, Niacin, panthoten acid, folic acid) and minerals (Calcium, Magnesium, phosphorus, potassium, sodium). The extract moisturises and revitalizes, promotes the microcirculation of the skin and accelerate the oxygenating and cell regeneration.

APPLICATION

Apply generously onto the cleansed skin of the body, i.e. after shower or bath.
