

Anti Aging Sun Guard SPF 50

Ref 4220/4230
size 50ml/150ml

DESCRIPTION:

Adequate sun protection cannot always be guaranteed by seeking shade or wearing suitable clothes. The areas of the face (eye zone, nose, forehead, ears) or the body (chest, shoulders, knees, insteps of the feet) which are exposed to the sun are particularly at risk.

Anti Aging Sun Guard SPF 50 provides particularly optimal sun and cell protection for these sensitive areas of skin. It is also the ideal travel companion for trips to areas of especially intensive sun such as mountains or beaches.

With its ultra-strong sun filters, Anti Aging Sun Guard SPF 50 offers "high" sun protection and protects the skin against unwelcome hyperpigmentation. Further advantage includes its easy distribution. Furthermore, the lotion is almost invisible on the skin.

Generous application of Anti Aging Sun Guard SPF 50 is recommended for skin type I: very light skin, lots of freckles, very fair or strawberry blond hair, light eyes. No tanning; becomes sunburnt after a very short time without protection. Self-protection time: 5 – 10 minutes.

SPECIAL BENEFITS:

- Prevents hyperpigmentation
- Suitable for all especially sun-sensitive areas of skin
- Skin-friendly and photo stable UV filter substances
- Delays light-induced skin aging
- Waterproof lotion with protection against UVA and UVB rays
- Acts to combat sunburn and moisture deficits

SPECIAL INGREDIENTS:

- **UVA/B broadband filters**
- **Titanium dioxide:** Micro-fine physical UVA and UVB sun filter
- **Ectoin®:** The natural active ingredient Ectoin® is obtained from microorganisms that live in extreme environments (e.g. in geysers, salt lakes or in the ice of the Arctic). The Ectoin® formed in the micro-organisms protects them from the extreme environmental factors prevailing there. Ectoin® is used in cosmetics because it has caring, anti-inflammatory and protective properties. Cells are stabilised by Ectoin® and thus protected against harmful environmental influences such as UVA and UVB radiation.

APPLICATION:

Apply Anti Aging Sun Guard SPF 50 generously onto areas of skin not covered by clothing 30 minutes before exposure to the sun. Prevent the product from coming into contact with the eyes and mucous membranes. Allow the sun protection to work in completely to prevent e.g. discoloration of textiles.
