GLOW & RADIANCE
24H CREAM

Short Description

24h cream with comprehensive protection for a healthy radiance and more glow.

Product Galenics

Delicate, apricot-coloured cream

Product Description

24h cream with WiFi and Blue Light protection that gives the skin luminosity and a fresh, healthy radiance. Short and long chain hyaluronic acid smoothes the first wrinkles. The extract from the superfruit Araçá de Agua increases elasticity and reduces redness and signs of fatigue. Camelina oil strengthens the skin barrier and soothes. A UV filter protects against the negative effects of sunlight.

Effects and Characteristics

- 100% vegan
- WiFi and Blue Light protection through extract from Tetrademus obliquus algae
- UV protection
- Superfruit Araçá de Agua reduces redness and improves skin tone
- Hyaluronic Acid acts as a filler and smoothes the first wrinkles
- Camelina oil strengthens the skin barrier and soothes.

Special Ingredients

- **Long-chain Hyaluronic Acid:** Large molecules that cannot penetrate the skin bind moisture on the top layer of the skin.
 - Binds water in the skin
 - Visible smoothing and tightening of the skin
 - Visible reduction of wrinkles
- **Camelina oil:** Is extracted from the seeds of the gold-of-pleasure plant (Camelina Sativa), which belongs to the cruciferous family. In the Bronze and Iron Ages, the plant, which owes its name to its frequent occurrence in fields of flax, was an important crop. Recently, gold of pleasure has been rediscovered, especially in organic farming. The seeds contain 30 to 40% oil, which is obtained by cold pressing or extraction. The high-quality oil strengthens the skin barrier.
- **Superfruit Araçá de Agua:** The active ingredient extracted from the superfruit Araçá de água has a high vitamin C content. Which gives it an excellent antioxidant effect, which protects the cells from free radicals. In addition, it supports the body's own collagen formation in the deeper layers of the skin, ensuring healthy maintenance of connective tissue function. Improves the elasticity of the skin
 - Reduces signs of fatigue/lightening under the eyes + 667% after 28 days (in vivo)
 - Improves skin redness + 74 % after 28 days (in vivo)
 - Increases skin radiance + 337 % after 28 days (in vivo)
- **Freshwater algae (Tetrademus obliquus):** The active ingredient replenishes the carotenoid depot. By reducing ROS production and lipid peroxidation, it protects against radiation from various sources (e.g. WiFi). Extract from the freshwater algae Tetrademus obliquus from sustainable sources.
 - Blue light stimulation: - 42 % less ROS (in vitro)
 - WiFi radiation (smartphone): - 73 % less ROS (in vitro)
 - WiFi radiation (router): - 71 % less ROS (in vitro)
 - Increase in skin hydration: + 17 % after 28 days (in vivo)
 - Reduction in skin roughness: - 3 % after 28 days (in vivo)
 - Increase in skin elasticity: + 2 % after 28 days (in vivo)

Application

After cleansing and toning, apply generously to face, neck and décolleté in the morning and evening.
