Short Description

Triple G Serum is a power booster for radiant, fresh skin.

Product Galenics

Delicate apricot coloured serum

Product Description

The serum is the most intensive form of care with the highest combination of active ingredients and a true power booster for skin that glows from the inside out, looks fresh and is perfectly protected at the same time. Short- and long-chain hyaluronic acid acts like a filler on small wrinkles, camelina oil strengthens the skin barrier and soothes, an extract from green algae improves the glow and delicate shimmer pigments give more radiance.

Effects and
Characteristics

- 100 % vegan
- highest concentration of active ingredients
- Glow booster through green algae extract
- delicate shimmering pigments give more radiance
- Hyaluronic Acid acts as a filler and smoothes the first wrinkles
- Camelina oil (gold of pleasure oil) strengthens the skin barrier and soothes.

Special Ingredients

- **Long-chain Hyaluronic Acid:** Large molecules that cannot penetrate the skin bind moisture on the top layer of the skin.
 - Binds water in the skin
 - Visible smoothing and tightening of the skin
 - Visible reduction of wrinkles
- **Camelina oil:** Is extracted from the seeds of the gold-of-pleasure plant (Camelina Sativa), which belongs to the cruciferous family. In the Bronze and Iron Ages, the plant, which owes its name to its frequent occurrence in fields of flax, was an important crop. Recently, gold of pleasure has been rediscovered, especially in organic farming. The seeds contain 30 to 40 % oil, which is obtained by cold pressing or extraction. The high-quality oil strengthens the skin barrier.
- **Extract from green algae:** The highlighter active ingredient with detox effect ensures a radiant complexion with a special glow effect. It stimulates the cell's own proteasome activity („waste disposal of the cell“) and reduces the level of oxidised proteins in the skin cell.

Cosmetic benefits:

- Improvement of colour intensity and skin radiance + 200% (in vivo).

Application

Apply to the face, neck and décolleté in the morning and evening after cleansing and before the skin care cream.
